Trilingual (FR / EN / SR)

Profile

IT Project Manager & Software Engineer with experience in project coordination, change & release management, application support, and R&D in software engineering. Solid background in web development, IT infrastructure, e-commerce, and digital platforms, with both industry and academic research experience.

Experience

HEIG-VD – University of Applied Sciences Western Switzerland

R&D Collaborator in Software Engineering | Aug 2022 – Present | Yverdon-les-Bains, Switzerland

Applied research in software engineering.

Major projects:

Opendidac: Open-source educational platform for managing exercises and summative exams in an engineering context. Built with Next.js, Prisma, and PostgreSQL, the platform supports advanced training with specialized question types tailored for software engineering education. In the 2024–2025 academic year at HEIG-VD, it was actively used across 18 different courses, involving more than 50 professors and assistants and reaching over 650 students. The system supported 6 final exams and 72 written tests (TEs), along with several laboratory sessions, demonstrating its reliability and value in real academic use.

CIIP (Conférence Intercantonale de l'Instruction Publique): Developer and maintainer of the CIIP platform, supporting coordination of education across French-speaking Swiss cantons. Worked on both frontend (Vue.js) and backend (Java Spring Boot, MySQL), implementing new features, maintaining modules, and ensuring platform reliability. This project strengthened practical experience with Java in a production environment alongside modern web frameworks and relational databases.

Data-Driven Surveys (DDS): Research platform integrating participants' online data into surveys, resulting in a publication at ACM CHI 2024 (A* ranked conference).

Nestlé – Globe IS/IT

Consultant Business Solutions / Jun 2011 – Mar 2015 / Bussigny, Switzerland

- Acted as technical global application owner, ensuring security, availability, and lifecycle management of critical business applications.
- Coordinated projects in the Globe IS/IT program, including application security compliance (“Call to Arms”).
- Supervised L3 sustain support and incident resolution, working closely with offshore teams (Wipro, Chennai) for knowledge transfer and continuous service improvement.
- Managed and approved Change & Release processes for applications across the global IS/IT perimeter.
- Planned and supported large-scale server migrations and virtualization projects (Windows Server 2008).
- Contributed to the definition of application roadmaps, maintenance plans, and documentation to ensure alignment with compliance and business continuity standards.

Redcats

Developer | May – Jul 2011 | Montreux, Switzerland

Developed production performance reporting system, automating daily reports.

eegoes LLC

Web Developer | Mar – May 2011

Social media project development (HTML, CSS, PHP5, MySQL).

Lab4Tech

Web Developer | Jan – Mar 2011

Developed ASP.NET MVC 2 applications with C#, MS SQL 2008, ExtJS, JSON/XML.

AgenceWeb SA (Maxony Group)

Web Application Developer / E-Business Project Manager | Mar 2006 – Jan 2010 | Nyon, Switzerland

- Developed custom web and e-commerce solutions (e.g., e-facture system, distribution platforms).
- Managed digital projects including SEO, PPC campaigns, and online marketing strategies.

Education

Bachelor of Applied Science (BASc), Software Engineering
HEIG-VD – Yverdon-les-Bains, 2018–2022

CFC, Computer Science
École des Arches – Lausanne, 2004–2008

PMP Training
PMI – Altran Lausanne, 2016

Skills

Project & Management: Project Coordination, Change & Release, Testing/QA, Rollout, Knowledge Transfer, ITIL, Virtual Team Management, Budget Planning.

Technical: PHP, MySQL, MSSQL, ASP.Net, C#, HTML5, JavaScript, CSS, IIS, Apache, Powershell, RegExp, System Administration.

Languages: French (native), English (fluent), Serbian (fluent).

Personal: Strong communicator, critical thinker, conflict resolution, stress management, negotiation.
